RE: Objection to antibiotics in animal feed

Dear Commissioner Henney:

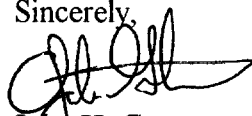

We are writing to express our objections to the use of antibiotics in animal feed.

Antibiotics are our greatest inventions in fighting disease. But their misuse or overuse is already resulting in the rapid development of resistant pathogen strains. We are very concerned that such resistance may be developing unnecessarily, and significantly faster than new antibiotics can be developed and manufactured.

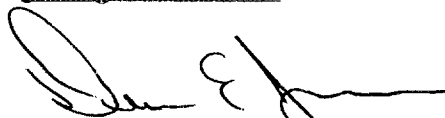

We hope that you will ban the use of antibiotics in animal feed.

Thank you.

Sincerely,

John H. Ganter
